Profile

A final-year Informatics student at Gunadarma University, enthusiastic about data science with data operations experience. Proficient in Python, SQL, and machine learning to solve business problems.

Proven as CMO at GDGoC, where I bridged the gap between technical development and strategic marketing. Capable of supporting real-world workflows by integrating data-driven insights into startup environments and digital services. Driven to contribute to impactful engineering teams, sharpen my analytical problem-solving skills, and collaborate with professionals to build scalable, AI-driven applications.

Education

Informatics Engineering, Gunadarma University	2022 - Present
• IPK: 3.78/4.00	
Multimedia, Taruna Terpadu Vocational School	2019 - 2022

Project Experience

Comparative Analysis of SMOTE Technique on Random Forest, CatBoost, LightGBM and XGBoost Algorithms in Heart Disease Prediction | *Undergraduate Research Project [2025]*

- Analyzed ML performance across Random Forest, CatBoost, LightGBM, and XGBoost for heart disease risk classification.
- Implemented SMOTE oversampling to address data imbalance, significantly improving model sensitivity for high-risk patients.
- Identified CatBoost/XGBoost as the most robust models for medical predictive analytics based on undergraduate research findings.

Predictive Analytics: Case Studies in Life and Annuities | *Study Case Research Project [2026]*

- Developed a predictive model achieving 94% accuracy using GLM and Random Forest to assess health risks in the insurance sector.
- Leveraged alternative data (lifestyle and demographics) to enable effective risk assessment without invasive medical testing.

Smart City Unified Dashboard | *Full-Stack Project [2026]*

- Engineered an end-to-end dashboard integrating real-time IoT monitoring and automated citizen complaint classification.
- Implemented an NLP classifier (XGBoost & TF-IDF) via FastAPI to predict responsible government agencies based on user reports.
- Designed a responsive Bootstrap 5 frontend with live data fetching to visualize city-wide traffic and infrastructure health logs.

Organisational Experience

Chief Marketing Officer, Google DGoC Gunadarma University *Sept 2024 - Present*

- Determine marketing goals and achievements
- Understand the latest marketing practices
- Design a strategy

Media Creative Core Team, Google DSC Indonesia *Mar 2024 - Sept 2024*

- Creating and preparing all graphic needs for GDSC Indonesia.
- Creating posts in coordination with other divisions (Technews, fun fact, etc.).
- Managing and taking control of GDSC Indonesia's social media accounts.
- Held a women in tech event "WomenLand: Girls Who Code, Girls Who Inspire!"

Media Creative Core Team, Google DSC Gunadarma University *Sept 2023 - Sept 2024*

- The Media Creative Division is responsible for the design and production for the materials used for advertising/broadcast
- Oversees the creation of art, photo, video, and layout design

Liaison Officer, Volunteer GDSC Event Pack *Jan 2024 - Feb 2024*

- Contact the speaker who will present the event
- Ensure speakers attend according to the rundown that has been made

Concept Team, Festival Film Boash *Dec 2021 - Feb 2022*

- Creating a creative festival concept and ensuring the entire event reflects our unique vision
- Collaborate with other teams to make sure this festival becomes a deep and meaningful experience for the audience

Pubdekdoc, BOCAFEST Event *Jan 2022 - Jun 2022*

- Ensure that the record-breaking achievements recognized by ORI (Original Rekor Indonesia)
- Designed and executed social media strategy
- Responsible for creating visual content, including images, graphics, and layouts, to convey messages and information effectively

Training & Certification

Data Science Fundamental, DQLab *Mar 2024*

- Learn Python Fundamental
- R Fundamental
- Fundamental SQL Using SELECT Statement.

Certificate of Competence, BNSP *Aug 2022 - Aug 2025*

- KKNI Level II on Multimedia Skills Competencies

Achievements

Passed the P2MW funding in 2024 by Belmawa Dikti KEMENDIKBUD worth 12,700,000,00 Rupiah.

As Chief Marketing Officer in Product called Recad Marketplace Sewa Alat Kesehatan. Recad is a medical equipment rental and leasing platform

2nd Winner at Innovation Hackathon 2023 by Google DSC Institute Technology Telkom Purwokerto

As UI/UX Designer in Si Paling Core Team who have an idea about application called "ToGether" an Innovative solution in recycling waste and revolutionizing the waste management system in Indonesia

3rd Winner at National Business Plan Competition 2025 by JACSEN Jambi University

As Chief Marketing Officer in Pengan Menang Team who have an idea about technology business called "Safi Watch" An Innovative Solution with a Smartwatch Based on Advanced Technology that Focuses on User Security

Skills & Tools

Skills

- **Core ML:** Supervised Learning (Regression, Classification), Predictive Modeling, Feature Engineering.
- **Statistical Analysis:** Exploratory Data Analysis (EDA), Hypothesis Testing, Data Cleaning & Integrity.
- **Python:** Proficient in Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.
- **SQL:** Writing complex queries for data extraction and manipulation.
- **Java:** Foundational knowledge for software development logic.

Hard Skills

- VSCode
- Google Colab
- HTML & CSS with Framework Tailwind
- Python
- R
- SQL and NoSQL
- Git & GitHub

Others

Bahasa (Native Speaker), English (Beginners)
